

## Webmail Forwarding

**Forward your Corporate webmail to your regular email with the following steps:**

# Webmail Forwarding

1. Log in to Your Corporate Webmail: <https://yourdomain.com/webmail>

cPanel® is connecting ..

trying: nonsecure

If you are not behind a firewall that blocks port 2096

**Enter Here**

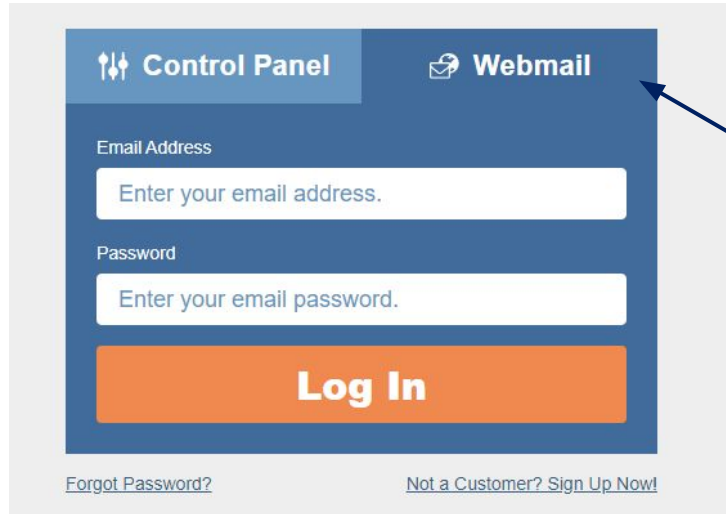

If you are behind a firewall and can not connect to port 2096

**Enter Here**

Click *Enter Here*

## 2. Log Into Your Corporate Webmail Account:

The screenshot shows a webmail login interface. At the top, there are two tabs: 'Control Panel' (with a settings icon) and 'Webmail' (with an envelope icon). The 'Webmail' tab is highlighted with a blue background. Below the tabs, there are two input fields: 'Email Address' with the placeholder text 'Enter your email address.' and 'Password' with the placeholder text 'Enter your email password.'. Below these fields is a large orange button labeled 'Log In'. At the bottom of the interface, there are two links: 'Forgot Password?' and 'Not a Customer? Sign Up Now!'. A blue arrow points from a text box on the right to the 'Webmail' tab.

Control Panel Webmail

Email Address  
Enter your email address.

Password  
Enter your email password.

**Log In**

[Forgot Password?](#) [Not a Customer? Sign Up Now!](#)

Make sure  
*Webmail* is  
selected

## 6. Create an Email Account Forwarder

**Webmail**

 ...com  Logout

### Forwarders

#### Create an Email Account Forwarder

Add Forwarder

Click Add *Forwarder*.

#### Email Account Forwarders

Send a copy of any incoming email from one address to another. For example, forward **joe@example.com** to **joseph@example.com** so that you only have one inbox to check. For more information, read the [documentation](#).
